

Impianto Nazionale 75 Profondità totale m. 2507. Inizio perforazione 2-2-1962. Intervalli in produzione STERILE. Ultima perforazione 26-4-1962. Inizio produzione.

AGIP ARCHIVIO POZZI AGE. Note: This section contains specific data points and observations related to the well's production and geological characteristics.

ANNOZZIONI. This section contains detailed geological notes and technical observations regarding the well's structure and the surrounding geological environment.

GEOLGICHE. This section contains geological notes and observations related to the well's location and the surrounding geological environment.

MINERARIE. This section contains mineralogical notes and observations related to the well's production and the surrounding geological environment.

TECNICHE. This section contains technical notes and observations related to the well's production and the surrounding geological environment.
