PHOTOGEOLOGICAL MAP

(by compilation and photointerpretation)

GEOMAP
STUDIO GEOLOGICO
FIRENZE - 1973

Scale 1:100.000

- OLOCENE**
 - Qp** Marsh deposits black earths.
 - Qal** Recent and actual alluvium, slushing deposits.
 - Qc** Colluvial and eluvial deposits (*terre rosse*).
 - Qt** Terraced alluvium.
 - d** Beach sand and dunes.
- PLEISTOCENE**
 - Qm** Yellow sand with littoral facies Pelecypoda. Calcareous crust on surface (*Crosta pugliese*).
 - br** Cemented breccia formed by calcareous elements from southern Gargano formations.
- MIOCENE**
 - M** Sandy fossiliferous limestone (*Tufo calcareo - Pietra leccese*).
- JURASSIC**
 - J** Oolitic, detrital and skeletal limestone (*Calcari oolitici di Coppa Guardiola*).

- Geologic boundary.
- - - Key bed.
- - - Fault observed, inferred.
- + Horizontal beds.
- + Dip less than 5°.
- + Dip from 5° to 15°.
- + Dip inferred from morphology.
- + Field measured dip.
- Scarp, terrace edge.
